Adult Neurology

Exceptional Neurology Care Close to Home

OU Health's neurology specialists deliver comprehensive, team-based care, using advanced technology and evidence-based research for improved quality of life. From migraine headaches to strokes, our team has the experience and expertise to provide the treatment you need.

Patients throughout the state and region will appreciate and benefit from fast access to expert neurology and neuroscience specialists who deliver comprehensive care. OU Health experts provide treatment for neurological conditions and procedures including:

Cerebrovascular Disorders – ischemic stroke, intracerebral hemorrhage, subarachnoid hemorrhage, hypercoagulable states, CADASIL, moyamoya disease, cerebral vein thrombosis, arteriovenous malformations (AVMs)

Dementia & Behavioral Neurology – memory loss, Alzheimer's disease, frontotemporal dementia, Lewy body disease, primary progressive aphasia, vascular dementia, cerebral amyloid angiopathy, chronic traumatic encephalopathy

Epilepsy – seizures, especially drug resistant or difficult to control (refractory)

Facial Pain and Nerve Conditions – trigeminal neuralgia, hemifacial spasm, Bell's palsy

Headache and Pain – migraine, cluster headache, hemicrania, idiopathic intracranial hypertension (pseudotumor cerebri), giant-cell (temporal) arteritis, fibromyalgia

Migraine-related Conditions – abdominal migraine, recurrent vertigo, postural orthostatic tachycardia syndrome (POTS), other transient spells

Movement Disorders – Parkinson's disease, essential tremor, dystonia, cervical dystonia (torticollis), blepharospasm, Huntington's disease, ataxia

Neuroimmunology – multiple sclerosis, neuromyelitis optica, optic neuritis, neurosarcoidosis, demyelinating disorders

Neuromuscular Disorders – muscular dystrophy, myasthenia gravis, spinal muscular atrophy, amyotrophic lateral sclerosis (ALS), Lambert-Eaton myasthenic syndrome, myopathy, polymyositis, dermatomyositis

Peripheral Nerve Disorders – polyneuropathies, carpal tunnel syndrome, ulnar neuropathy, radiculopathies (pinched nerves), brachial plexopathy, Charcot-Marie-Tooth disease, Guillain-Barré syndrome, chronic inflammatory demyelinating polyradiculoneuropathy (CIDP)

Spinal Cord Disease – myelopathy, transverse myelitis

Sports Neurology – concussion and long-term effects of head trauma

Procedures – electroencephalography (EEG), electromyography (EMG), Botox injections (for headache, spasticity, dystonia, and other neurologic conditions), occipital nerve blocks, vagal nerve stimulator (VNS) adjustment, deep brain stimulator (DBS) adjustment, responsive neurostimulator adjustment, lumbar puncture

Neurosurgery

The neurosurgery experts at OU Health use the most advanced diagnostic and therapeutic tools to diagnose and treat conditions of the brain and spine. These, and image-guided surgery techniques, have transformed many major surgeries into more minimally invasive procedures, resulting in fewer complications and reduced recovery time.

OU Health Neurosurgeons Treat:

- Aneurysms and vascular malformations
- Brain tumors
- Brain abnormalities
- Spine abnormalities & injuries
- Spinal problems
- Carotid artery blockages
- Parkinson's and essential tremor
- Epilepsy
- Carpal tunnel syndrome
- Stroke
- Pediatric neurosurgical conditions
- Minimally invasive robotic spine surgery
- Deep brain stimulation
- Pituitary tumors
- Skull base surgery

Cardiology

The expert cardiologists and cardiothoracic surgeons at OU Health specialize in prevention, diagnosis and treatment of disorders and illnesses affecting the heart and entire cardiovascular system. Our physicians practice research-based medicine and apply a multidisciplinary approach to treatment. We bring top specialists together to provide quality, comprehensive care supported by the most up-to-date technology.

Our cardiac experts provide advanced, research-based treatments for cardiac conditions, including:

- Arrhythmias
- Atrial fibrillation (Afib)
- Blood vessel and circulation problems
- Congestive heart failure
- Coronary artery disease
- Heart attacks and blockage of arteries
- Heart rhythm disorders
- High blood pressure
- Patent foramen ovale (PFO) and septal defects
- Peripheral artery disease
- Venous disease
- Ventricular tachycardia

Specialized treatments include:

Cardiac Catheterization & Electrophysiology Procedures – An advanced cardiac catheterization and electrophysiology lab for a wide range of diagnostic and interventional procedures such as:

- Ablation – Repairs heart tissue with alcohol solution, extreme heat or extreme cold
- Device lead extraction – For pacemakers and defibrillators
- Endovascular stenting – For abdominal aortic aneurysm
- Placement of permanent pacemaker (PPM) or implantable cardioverter-defibrillator (ICD)

Cardiac Surgery Procedures - New approaches for treating heart conditions that benefit from cardiovascular research and clinical trials.

- Aortic valve surgery
- Arrhythmia surgery
- Cardiac valve repair and replacement
- Coronary bypass surgery
- Complex cardiac surgery

Circulatory Conditions Treated - The Limb Preservation program improves cardiovascular health and prevents the need to remove a limb.

- Diabetic foot ulcers
- Leg pain, fatigue or weakness
- Prior amputations
- Poorly healing leg wounds

Vascular Services - Our vascular specialists treat blood flow and circulation problems including:

- Arterial disease
- Clotting disorders
- Lymphatic disorders
- Varicose vein disorder
- Venous insufficiency

Adult Urology

At OU Health Physicians, our experts have unique experience in treating a wide range of urologic conditions. Backed by advanced fellowship training, our team provides comprehensive care to address urologic cancers, men's health issues, male infertility, male and female genitourinary reconstruction, female pelvic health, voiding dysfunction, stone disease, and other urological challenges.

OU Health Physicians Urologists offer evaluation and treatment for:

- Urologic Cancer including Prostate, Bladder, Kidney, Testis, Adrenal, Urethra and Ureter
- Men's Health
- Male Infertility
- Prosthetic Devices (urinary sphincter and inflatable penile prosthesis)
- Erectile Conditions
- Voiding Dysfunction
- Prostate Enlargement
- Bladder and Urinary Tract Disorders and Diseases
- Urinary Stone Disease
- Female Pelvic Health

Our urologists have advanced training in minimally invasive treatment options, including:

- Robotic Surgery on Prostate, Kidney, Bladder and Adrenal Cancers
- Focal Prostate Cancer Therapy
- No Needle, No Scalpel Vasectomy
- Microsurgery Vasectomy Reversal
- Laser and Shockwave Stone Treatment
- Robotic Sacrocolpexy
- Ablative Renal Surgery
- Holmium Enucleation of the Prostate
- Uro-Lift Prostate Procedure
